## Proportional and Non-Proportional

## Int 1

## Relationships

For each of the following graphs, state whether they represent a proportional or nonproportional relationship and how you know.

4.

5.

Use the table to solve. Then explain your reasoning.
6. Which situation represents a proportional relationship between the number of laps run by each student and their time? Show your work and circle your answer:

Answer: MARIA or DESMOND

| Laps, $x$ | 2 | 4 | 6 |
| :--- | :---: | :---: | :---: |
| Maria's Time (s), $y$ | $\mathbf{1 5 0}$ | $\mathbf{3 2 0}$ | 580 |

| Laps, $x$ | 2 | 4 | 8 |
| :--- | :---: | :---: | :---: |
| Desmond's Time (s), $y$ | 146 | 292 | 584 |

7. Blake ran laps around the gym. His times are shown in the table. Blake is trying to decide whether the number of laps is proportional to the time. Find is mistake and correct it.

| Time (minutes) | 1 | 2 | 3 | 4 |
| :--- | :--- | :--- | :--- | :--- |
| Laps | 3 | 5 | 7 | 9 |

Blake's Thinking: It is proportional because the number of laps always increases by 2 .
8. A scuba diver descends, or goes farther underwater, at a constant rate of -5 feet every 20 seconds. Is the depth to which the diver descends proportional to the number of seconds it takes to get there? Show work and explain how you know.

| Time (seconds), $x$ | 20 | $\mathbf{4 0}$ | $\mathbf{6 0}$ | $\mathbf{8 0}$ |
| :--- | :---: | :---: | :---: | :---: |
| Depth (ft), $\boldsymbol{y}$ |  |  |  |  |

## Explanation:

## Use a table to help you solve. Then explain your reasoning.

9. Plant A is 18 inches tall after one week, 36 inches tall after two weeks, 56 inches tall after three weeks. Plant B is 18 inches tall after one week, 36 inches tall after two weeks, 54 inches tall after three weeks. Fill out the tables. Circle which situation represents a proportional relationship between the plants' height and the number of weeks it has been growing: PLANT A or PLANT B

| Week, $\boldsymbol{x}$ |  |  |  |
| :--- | :--- | :--- | :--- |
| Plant A's Height, $\boldsymbol{y}$ |  |  |  |

| Week, $x$ |  |  |  |
| :--- | :--- | :--- | :--- |
| Plant B's Height, $\boldsymbol{y}$ |  |  |  |

10. On Saturday, Sarah gave away 52 coupons an hour. Fill out the table. Is the number of coupons Sarah gave away proportional to the number of hours she worked that day?

| Hours worked <br> on Sunday | 1 | 2 | 3 | 4 |
| :--- | :---: | :---: | :---: | :---: |
| Coupons Given <br> away on Sat. |  |  |  |  |

11. The fee for ride tickets at a carnival is shown in the table below.

| Tickets | 5 | 10 | 15 | 20 |
| :--- | :---: | :---: | :---: | :---: |
| Fee (\$) | 5 | $\mathbf{9 . 5 0}$ | 14 | 18.50 |

a) Is the fee proportional to the number of tickets? Explain your reasoning.
b) Determine the fee for 30 ride tickets? Explain how you found it.
12. Brianna started with 20 songs on her iPod. Then, she downloaded 9 new songs each month. Complete the table below. Is the number of songs downloaded proportional to how many months have passed?

| Month | $\mathbf{0}$ | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ |
| :--- | :---: | :---: | :---: | :---: |
| Number of Songs |  |  |  |  |

13. Tickets to the school dance cost $\$ 5$ per student. Are the ticket sales proportional to the number of tickets sold? Complete the graph below and explain how you know.

| Number of <br> tickets sold | Ticket Sales |
| :---: | :---: |
| 1 | $\$ 5$ |
| 2 | $\$ 10$ |
| 3 | $\$ 15$ |

## Explanation:

14. Each week I borrow $\$ 15$ from my parents. The table below shows my debts for a number of weeks. Is my debt proportional to the number of weeks? Complete the graph below and explain how you know.

| Weeks | Debt (\$) |
| :---: | :---: |
| 1 | -15 |
| 2 | -30 |
| 3 | -45 |

## Explanation:

Determine whether the relationship between the two quantities shown in each table is proportional by graphing on the coordinate plane. Explain your reasoning.

15. | Savings Account |  |
| :---: | :---: |
| Week | Account <br> Balance (\$) |
| 1 | 175 |
| 2 | 100 |
| 3 | 25 |

Explanation:

Weeks

16. | Calories in <br> Fruit Cups |  |
| :---: | :---: |
| Servings | Calories |
| 1 | 100 |
| 3 | 300 |
| 4 | 400 |

Explanation:

17. The Calories burned for exercising various number of minutes are shown in the graph. Which statement about the graph is NOT TRUE?
A) The number of Calories burned is proportional to the number of minutes spent exercising.
B) The number of Calories burned is not proportional to the number of minutes spent exercising.
C) The line passes through the origin.
D) The line is straight.
