

Hello Students and Parents of my 7th Grade Math Classes!

Today in class we learned lesson 6-8 - Surface Area and Volume of Composite Figures. Upon further review of their HW assignment, I have decided to make the following changes:

REQUIRED: Students need to complete questions #2, #3, #7, #8, and #10. I will be posting answers to my website so that you can verify your work. Visit [misspyper.weebly.com](http://misspyper.weebly.com) password: lehijrmath.

OPTIONAL: Any additional questions that are completed on this 6-8 HW assignment will award the student extra credit.

PLEASE relay this message on to your child and any other friends that have me as their 7th grade math teacher. I will be making this message visible on my website as well as through the Remind system.

As always, let me know if you have any questions/concerns.

Thank you,  
Tiffany Pyper
